Shinwa Co., Ltd.

Expansion of Aerospace and Defense Quality Management System Certification Scope

Shinwa Co., Ltd. is pleased to announce the expansion of the certification scope of its Aerospace and Defense Quality Management System, JIS Q 9100 (AS9100 equivalent).

In addition to the existing certified activities covering the design, development, manufacturing, and maintenance of jigs and tools for aerospace equipment, the certification scope has now been expanded to include the manufacturing of defense-related products.

This expansion is intended to support growing demand in the aerospace and defense sectors, enhance business opportunities, and further strengthen the Company's operations.

While responding flexibly to changes in the business environment, Shinwa will continue to reinforce its commitment to the defense industry and contribute to society through enhanced quality, reliability, and customer satisfaction.
